

A COMPREHENSIVE REMOTE SUPPORT SOLUTION

SimplyHome sensor-based technology can integrate with Lifesherpa remote support platform and workforce solution to drive person-centered outcomes and maximize staffing efficiencies. *SimplyHome* sensors can detect a need for support, prompting the individual to access their Lifesherpa app. The Lifesherpa app will take the individual step-by-step through their customized routine while simultaneously notifying caregivers if support is needed and when the activity is completed. Through the Lifesherpa app, the caregiver can provide remote support, access real-time data, and utilize customized reporting tools leading to greater organizational capacity and empowered self-advocates.

The Lifesherpa + *SimplyHome* Advantage:

- Full 360° visibility and control of client environment and activities
- Ability to monitor, coach, and drive daily living activities remotely
- Provides staff with real-time insights to enhance coordinated care
- Improve communication between staff, residents, and administrators
- Integration ready with current in-house systems
